

DEPARTMENT OF WATER, ENVIRONMENT AND CLIMATE CHANGE

CLIMATE CHANGE PROPOSAL VETTING PROCESS

Objective:

To establish a systematic and transparent process for vetting climate change proposals from community members to ensure alignment with county priorities and successful implementation.

Step 1: Proposal Submission by Community Member

Community members submit climate change proposals to the Ward Climate Change Planning Committee.

Step 2: Initial Review by Ward Climate Change Planning Committee

The Ward Committee reviews the proposal for initial feasibility and alignment with local climate needs.

Step 3: Revise Proposal if Needed

Community member revises the proposal based on the initial feedback

Step 4: Submission to the Climate Change Unit (CCU)

The Ward Committee submits the revised proposal to the Department for technical review.

Step 5: Technical Review by Climate Change Unit

The Department conducts a detailed technical review of the proposal, assessing feasibility, impact, and alignment with climate change strategies

Step 6: Feedback to Community Member Via Ward Committee

The Climate Change Unit provides feedback to the community member via Ward Committee on the technical review.

Step 7: Revise Proposal if Needed

Community member, with the help of the Ward Committee, revises the proposal based on the technical feedback.

Step 8: Final Approval by County Climate Change Unit

The Climate Change Unit reviews the proposal and makes a final decision on approval.

Step 9: Endorsement by County Climate Change Planning Committee

The successful proposals are submitted to the Planning Committee for endorsement and Final Approval
